ON DENTAL HYGIENE

A CLEAN MOUTH IS A HAPPY MOUTH!

Not all mouthwashes are created equal. Just because you are familiar with a popular brand name doesn't mean it's the best or healthiest. Here are a few reasons why Oxyfresh all-natural mouthrinses are the safer and smarter choice for you and your family.

5 reasons to rethink your mouthwash and get real with ingredients

1. Sweet Ingredients

We use xylitol, the highly effective, all-natural alternative found in many fruits and vegetables. Xylitol has a myriad of benefits. It not only naturally reduces harmful bacteria, it reduces tooth decay, increases bone density and prevents ear infections. All this and it has 40 percent fewer calories than sugar and is naturally sugar-free.

2. Oxygene Gets Your Mouth Clean

There's masking odors and then there's neutralizing them. Volatile sulfur compounds are the cause of that stinky breath, and in order to effectively get rid of them they need to be broken down by an oxidization process. The Oxygene found in Oxyfresh products is a non-toxic oxidizing agent that breaks down VSCs that cause odors. These stubborn, foul-smelling compounds get trapped in deep tongue crevices and cause bad breath. The worst part? Toothbrushes aren't designed to reach these deep pockets ... but Oxygene mouthrinse can.

3. The Benefits of Fluoride

Possibly the best fighter for tooth decay and bacteria, fluoride mouthrinse is a great solution for preventative oral care. Oxyfresh Fluoride Mouthrinse with Fresh Mint is the perfect choice for someone wanting extra protection. Our formula is safe for everyone in the family to use. This mouthwash is especially recommended for those families who live in areas with inadequate fluoride supply in their drinking water.

SWISH THIS:

Power Rinse w/ Lemon Mint

Fight bad breath for six hours with Zinc, Oxygene®, aloe and lemon-mint flavor.

4. Choose Best For You

Whatever your dental needs are, we have a product specially designed for you. Select the right fit for your needs.

Fresh Mint Rinse – Perfect for the whole family

Patented Zinc Mouthrinse with Fresh Mint - Eliminates bad breath at its source

Lemon Power Rinse – The longest- lasting fresh breath formula

Fluoride with Fresh Mint – Basic daily protection against bad breath and tooth decay

Unflavored - Uniquely designed for daily use and contains no flavors or sweeteners

5. What You Don't Know

Did you know most popular brand-name mouthwashes contain alcohol? Some people say the burn of a mouthwash is proof that it's working, and in one aspect it is. Alcohol is an effective ingredient because it dries the mouth and reduces all bacteria. Ultimately, drying out the mouth and reducing bacteria is harmful. A dry mouth can lead to gum reduction and sores, and some studies show that this can lead to certain types of diseases and cancers. Reducing bacteria is a good thing, but alcohol kills both good and bad bacteria. Children are especially vulnerable to the harmful effects of mouthwashes. In fact, The American Association of Poison Control Centers reports there are over 10,000 calls each year involving children and over-digestion of mouthwash.

Closing Thoughts

Your oral health is of the utmost importance. You should be able to count on your oral hygiene products to be safe, natural and effective. It's our job to care about your teeth and we've gone out of our way to make sure our mouthrinses are the best available.

Patented Zinc w/ Fresh Mint Rinse

Our exclusive water additive boosts energy and turns plain drinking water into a refreshing fat-burning beverage.
