WHAT'S IN YOUR LATHER? SELECT YOUR SOAP WISELY

Whether we step under a shower faucet or immerse ourselves in warm bath ... we get wet to get clean. But water alone will not wash away the impurities that cling to our body. For that, we use soap. But what's in the soap you use? You might be surprised to learn that a majority of supermarket body cleansers are "sweetened" with artificial fragrances that can irritate skin, have a high pH that can dry the skin, and contain insoluble elements that can create a coat that makes it difficult for your skin to "breathe." There is a better way to get clean.

5 reasons why Cleansing Gelé is the soap you should be using

1. It contains the odor eliminator Oxygene®

Cleansing Gelé is the only body wash you'll find with Oxygene®, an exclusive ingredient scientifically proven to break down and neutralizes compounds that cause odors. Effective and 100 percent safe, Oxygene® literally divides and conquers germs, breaking bonds that cause odors into millions of independent molecules that are odor-free — unless they band together again. And Oxygene® discourages odor compound reunions.

2. It won't leave a residue behind

You can rinse all day long, but if your soap contains insoluble elements (like you'll find in most store brands) you will be left dealing with the chalky aftermath on your skin. Same is true for your bath or shower. We're all familiar with nasty "shower scum" that has to be frequently scrubbed away. Cleansing Gelé simply will not leave residue in its wake like many other soaps because it is made with all natural, pure ingredients.

3. It is not weighted down with heavy perfumes

Fresh and clean. That's what we all want from a bath or shower. Unfortunately, many soaps give us more than we bargain for by adding overbearing perfumes. Just take a stroll down your supermarket soap aisle. Even thick packaging can't contain the powerful aromas. Those smells are made with chemical additives that have no cleansing value and can cause skin irritation. Cleansing Gelé cleans without heavy "perfuming."

PRODUCT CORNER

Heavenly Cleansing Gelé

It's the only scented hand and body cleanser with Oxygene®.

4. It's skin-friendly

Don't just clean your body . . . rejuvenate it. Healthy skin requires a variety of vitamins to keep it resilient. Cleansing Gelé is formulated with vitamin A, vitamin E, vitamin C and vitamin D. The antioxidants in these vitamins help prevent skin damage that can be caused by free radicals. Cleansing Gelé is also infused with minerals and moisturizers to soothe and nourish your skin, leaving you feeling relaxed and invigorated.

5. It will soothe and protect

Cleansing Gelé is formulated with aloe vera, which has been trusted for centuries to alleviate skin conditions of all kinds and restore a radiant glow to your entire body. This botanical is actually a combination of many different vitamins and minerals. Working together, these vital nutrients help give aloe vera its soothing and healing properties.

Closing thoughts

At Oxyfresh, we made a commitment more than 25 years ago to offer extraordinary products that exceed the demands of health and environmentally conscious consumers. That's why our nature-based products like Cleansing Gelé are pure, safe and simple and formulated with the special ingredient Oxygene®, which safely neutralizes odor-causing compounds while you clean virtually any surface. Why settle for anything less than Oxyfresh Cleansing Gelé?

Cleansing Gelé

Let the minerals, moisturizers, and vitamins soothe and nourish your skin.
