## HELP NURTURE A HEALTHY AND ACTIVE PET THIS HOLIDAY SEASON

By Boyd Harrell, DVM

Our pets provide us with unconditional love and instinctively know just the right time to snuggle up close and give us the undivided attention we're looking for. This genuine loyalty is what makes our pets such an integral part of our lives. For everything they do for us, it's important to remember that in return, our pets trust us to provide for their critical needs like food, comfort and health. That's why it is so important we educate ourselves on the value of providing them with premium nutritional support.

Looking for the perfect gift for the pet lover on your shopping list? Look no further!

### 5 reasons Pet Jerky treats are perfect for any pet

#### 1. Pets with healthy smiles may live longer

To thrive and not merely survive, our pets should have a daily source of animal protein — MEAT — in their diets. Protein is an important component of every cell in our pets' bodies because it is an essential building block of bones, muscles, cartilage, skin and blood. Plus, feeding your pet a quality protein can reduce organ stress over time. Pet Jerky is loaded with 22 percent high-quality protein — that's far more than the leading store brand of pet protein treats.

#### 2. They strengthen the immune system

When the immune system is happy so is the body. Pet Jerky, with its antioxidant sources, supports optimum function of the immune system. That means your pet is much more likely to remain in peak health and alertness, free of disease and age-related ailments that can be caused by free radical damage. The immune system is pivotal in your pet's overall health, so it makes good sense to do what we can to keep it in tip-top shape.

## PRODUCT CORNER

### PET JERKY TREATS

A healthy snack that combines delicious beef jerky with the nutraceuticals glucosamine, MSM, and chondroitin to offer ultimate nutritional support for your pet.

or Go Online at [Oxyfresh.com](http://Oxyfresh.com)**

### 3. They keep pets agile and energetic

One secret to staying “young” as the years pass is to have good functioning joints and flexible muscles. Over time, with accumulated free-radical damage, muscles may tighten and joint cartilage can wear, while diminishing lubricating joint fluid makes it less slippery. All this can cause discomfort and reduce mobility. Daily Pet Jerky treats help keep pets active and feeling good. Glucosamine and chondroitin keep joint cartilage in good repair and joint fluid in sufficient amounts, while MSM helps reduce inflammation and increase flexibility.

### 4. They’re a great dose of healthy energy

You love watching the playful exploring energy of your pet. Well, all that frolicking, combined with rapid growth, can put a lot of stress and strain on young muscles, bones and joints — especially the hips, elbows and shoulders. Pets that grow the fastest and gain weight the quickest are the most prone to joint problems like hip dysplasia and damaged shoulder cartilage. Nutraceuticals in Oxyfresh Pet Jerky deliver optimum nutritional support to keep pets happy and active.

### 5. They’re delicious — and you get all the credit!

An unmistakable benefit of Pet Jerky treats is pets absolutely love them. Who knew being healthy could be so much fun? And you get all the credit for being a human candy machine. Unlike candy, though, Pet Jerky treats work hard to protect your pet and keep him healthy.

## CLOSING THOUGHTS

No matter what type of pet you’ve got, Oxyfresh Pet Jerky treats deliver outstanding health benefits from a premium formulation that can’t be beat. These delicious and nutritious treats are made with 100 percent real beef and contain glucosamine and MSM to offer superior support to healthy joints while stimulating cartilage growth. Give your pet something healthy to chew on!

### BOYD HARRELL, DVM

Dr. Harrell is a former multi-veterinary practice owner, an international speaker and a pet health advisor for Oxyfresh. He is formally trained in life, leadership, health and business coaching and holds advanced certifications in “The Model of Human Behavior,” which is the model of how people interact and what does and does not motivate them.
